Returning to School Provides Serious Fun

Brian Chiasson

When I was a kid, I was a poor student.

Yes, I lived in a poor neighbourhood, but more importantly I garnered among the lowest of classroom grades.

Seriously! It wasn't fun.

In my teens, I invited Jesus Christ into my life to change me into a whole new person.

At the same time, believe it or not, my brain came to life and my grades skyrocketed.

High school became a place for some serious fun. I even started memorizing entire books of the bible, one verse at a time.

I achieved 100 percent on several tests in several classes. I merely memorized all the notes distributed in class and memorized the keywords in the assigned textbook chapters.

It was the same when I took specialized courses, after high school, dealing with topics like computer programs and graphic arts.

When you study and know the answers, you are not nervous during tests. In fact, you are excited about it. Also, in 1997, I joined Mensa.

My point – returning to school can be fun.

MALTON ELECTION

Masthead

Local City Fun needs to fill the vacant positions below. These roles are voluntary only because Local City Fun does not have the budget to pay people. That might change if we gain enough advertisers or subscribers.

While education and experience are important, hard work and excellence are far more valuable. Your ability to work beyond the level of mediocrity will be far more persuasive than your education and experience.

Mind you, education and experience facilitate exceptional results, even if most people have wasted theirs. Here are the positions Local City Fun needs to fill.

MONSTER TO RUN MALTON?

Most Mississauga residents are terrified of one Malton political candidate.

She probably has some amazing qualities but who can detect them - they are hidden behind extremely bad people skills, which the media is only too happy to expose.

She could probably undergo a significant perception makeover by volunteering for a charity and refusing to take a leadership role, like Jesus did when washing feet.

Everyone might otherwise suspect she would only volunteer if she was in charge,

which wouldn't help her image at all.

She needs to serve in a humble capacity without requiring recognition.

Mind you, without recognition, nobody will know if she ever truly cares about others, as opposed to seeking stardom with a salary.

Her most effective option is to serve Hazel, but I can't imagine Hazel trusting her without a heart, brain and DNA transplant - creating a whole new person, perhaps becoming unrecognizable, like appearing to be a man.

Perish (did I spell it correctly?) the thought.
